

Lec 1

1-What are the four tags required in every HTML page?

1-The four commonly used tags in HTML are:

2-<!DOCTYPE html>: Declares the HTML version.

3-<html>: The root element of the page.

4-<head>: Contains metadata and other information.

5-<body>: The main content area of the page.

These four tags are foundational in structuring an HTML document and are commonly used across most web pages.

2-What is HTML emojis tags and write simple program to display some emojis?

HTML emoji tags allow you to display emojis in your HTML content. The `` tag is commonly used for this purpose. You can use Unicode character representations, such as `😀`, to represent specific emojis. By enclosing these codes within `` tags, you can display the emojis directly on your webpage.

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="UTF-8">
  <title>Emoji</title>
```

```
</head>
<body>
  <h1>Emoji Examples</h1>
  <p>
    <span>#128514;</span>
    <span>#128507;</span>
    <span>#128511;</span>
  </p>
</body>
</html>
```

3-Make a personal web. Type a few paragraphs to introduce yourself to the world and use the HTML tags you've learned in this Experiment to make them into a web page?

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
<meta charset="UTF-8">
```

```
<title>introduction </title>
```

```
</head>
```

```
<body>
```

```
<h1>Hi, </h1>
```

```
<p> <b>Welcome to my page. <br>My name is Safa nice to meet you. <br> This is  
some emoji that I learned in this Lecture 1, <b></b></p>
```

```
</b><p>
```

```
<span>#128514;</span>
```

```
<span>#128507;</span>
```

```
<span>#128511;</span>
```

```
</p>
```

```
<h2>Some other style tags</h2>
```

 - Bold text

 - Important text

 <i> - Italic text</i>

 - Emphasized text
